Section 3 contains examples of three important tools for helping schools implement effective diabetes management—a sample Diabetes Medical Management Plan, a sample template for an Individualized Health Care Plan, and sample Emergency Care Plans for Hypoglycemia and Hyperglycemia.

- The **Diabetes Medical Management Plan (DMMP)** is completed by the student’s personal diabetes health care team and contains the medical orders that are the basis for the student’s health care and education plans.

- The **Individualized Health Care Plan (IHP)** is prepared by the school nurse and contains the strategies for implementing the medical orders in the DMMP in the school setting.

- The **Emergency Care Plans for Hypoglycemia and Hyperglycemia**, based on the DMMP, summarize how to recognize and treat hypoglycemia and hyperglycemia and who to contact for help. The school nurse will coordinate development of these plans. Emergency care plans should be completed for each student with diabetes and should be copied and distributed to all school personnel who have responsibility for students with diabetes during the school day and during school-sponsored activities. Provide completed copies to the parents/guardian as well.
How to Use the Tools for Effective Diabetes Management

- The parents/guardian should give the sample Diabetes Medical Management Plan (DMMP) to the student’s personal diabetes health care team as a resource for preparing the medical orders.
- The student’s personal diabetes health care team should fill out the plan, sign it, review it with the parents/guardian and the student, and return it to the school nurse before the student with diabetes returns to school after diagnosis, or when the student transfers to a new school.
- The student’s personal diabetes health care team should review and update the DMMP at the beginning of each school year or upon a change in the student’s prescribed care regimen, level of self-management, school circumstances (e.g., a change in schedule), or at the request of the student or parents/guardian or the school nurse.
- The school nurse should prepare the Individualized Health Care Plan (IHP) based on the medical orders in the DMMP and review it with the parents/guardian and the student.
- The school nurse should adapt the sample Emergency Care Plans for Hypoglycemia and Hyperglycemia to meet the needs of individual students, as prescribed in the student’s DMMP.
- The Emergency Care Plans should be copied and distributed to all regular and substitute personnel who have responsibility for the student with diabetes during the school day and during school-sponsored activities. Consider laminating these plans for use throughout the school year. Provide copies to the parents/guardian.
- During all levels of training, information in the Emergency Care Plans on the signs and symptoms of hypoglycemia and hyperglycemia, how to respond, and who to contact for help in an emergency should be reviewed with school personnel.
Diabetes Medical Management Plan (DMMP)

This plan should be completed by the student’s personal diabetes health care team, including the parents/guardian. It should be reviewed with relevant school staff and copies should be kept in a place that can be accessed easily by the school nurse, trained diabetes personnel, and other authorized personnel.

Date of Plan: ___________ This plan is valid for the current school year: _____ - _____
Student’s Name: ___________________________ Date of Birth: ________________
Date of Diabetes Diagnosis: ___________ □ type 1 □ type 2 □ Other__________
School: ___________________________ School Phone Number: ____________________
Grade: _______________ Homeroom Teacher: _______________________________
School Nurse: ___________________________ Phone: _________________________

CHECKING BLOOD GLUCOSE

Target range of blood glucose: □ 70–130 mg/dL  □ 70–180 mg/dL
□ Other: __________________________

Check blood glucose level: □ Before lunch  □ _____ Hours after lunch
□ 2 hours after a correction dose  □ Mid-morning  □ Before PE  □ After PE
□ Before dismissal  □ Other: __________________________

□ As needed for signs/symptoms of low or high blood glucose
□ As needed for signs/symptoms of illness

Preferred site of testing: □ Fingertip  □ Forearm  □ Thigh  □ Other: _______

Brand/Model of blood glucose meter: __________________________

Note: The fingertip should always be used to check blood glucose level if hypoglycemia is suspected.

Student’s self-care blood glucose checking skills:

□ Independently checks own blood glucose
□ May check blood glucose with supervision
□ Requires school nurse or trained diabetes personnel to check blood glucose

Continuous Glucose Monitor (CGM): □ Yes  □ No
Brand/Model: __________________________  Alarms set for: □ (low) and □ (high)

Note: Confirm CGM results with blood glucose meter check before taking action on sensor blood glucose level. If student has symptoms or signs of hypoglycemia, check fingertip blood glucose level regardless of CGM.

HYPOGLYCEMIA TREATMENT

Student’s usual symptoms of hypoglycemia (list below):

________________________________________________________________________

________________________________________________________________________

If exhibiting symptoms of hypoglycemia, OR if blood glucose level is less than ______ mg/dL, give a quick-acting glucose product equal to ______ grams of carbohydrate.

Recheck blood glucose in 10–15 minutes and repeat treatment if blood glucose level is less than ______ mg/dL.

Additional treatment: __________________________
HYPOGLYCEMIA TREATMENT (Continued)

Follow physical activity and sports orders (see page 7).

- If the student is unable to eat or drink, is unconscious or unresponsive, or is having seizure activity or convulsions (jerking movements), give:
  - Glucagon: □ 1 mg □ 1/2 mg Route: □ SC □ IM
  - Site for glucagon injection: □ arm □ thigh □ Other: ___________________________
  - Call 911 (Emergency Medical Services) and the student’s parents/guardian.
  - Contact student’s health care provider.

HYPERGLYCEMIA TREATMENT

Student’s usual symptoms of hyperglycemia (list below):

__________________________________________________________________________
__________________________________________________________________________

Check □ Urine □ Blood for ketones every _____ hours when blood glucose levels are above _____ mg/dL.

For blood glucose greater than _____ mg/dL AND at least _____ hours since last insulin dose, give correction dose of insulin (see orders below).

For insulin pump users: see additional information for student with insulin pump.

Give extra water and/or non-sugar-containing drinks (not fruit juices): _____ ounces per hour.

Additional treatment for ketones: ____________________________________________

Follow physical activity and sports orders (see page 7).

- Notify parents/guardian of onset of hyperglycemia.

- If the student has symptoms of a hyperglycemia emergency, including dry mouth, extreme thirst, nausea and vomiting, severe abdominal pain, heavy breathing or shortness of breath, chest pain, increasing sleepiness or lethargy, or depressed level of consciousness: Call 911 (Emergency Medical Services) and the student’s parents/guardian.

- Contact student’s health care provider.
INSULIN THERAPY

Insulin delivery device: ☐ syringe  ☐ insulin pen  ☐ insulin pump

Type of insulin therapy at school:
☐ Adjustable Insulin Therapy
☐ Fixed Insulin Therapy
☐ No insulin

Adjustable Insulin Therapy

• Carbohydrate Coverage/Correction Dose:
  Name of insulin: __________________________________________________________

• Carbohydrate Coverage:
  Insulin-to-Carbohydrate Ratio:
  Lunch: 1 unit of insulin per _____ grams of carbohydrate
  Snack: 1 unit of insulin per _____ grams of carbohydrate

Carbohydrate Dose Calculation Example

\[
\frac{\text{Grams of carbohydrate in meal}}{\text{Insulin-to-carbohydrate ratio}} = \text{_____ units of insulin}
\]

• Correction Dose:
  Blood Glucose Correction Factor/Insulin Sensitivity Factor = ______
  Target blood glucose = ______ mg/dL

Correction Dose Calculation Example

\[
\frac{\text{Actual Blood Glucose–Target Blood Glucose}}{\text{Blood Glucose Correction Factor/Insulin Sensitivity Factor}} = \text{_____ units of insulin}
\]

Correction dose scale (use instead of calculation above to determine insulin correction dose):

Blood glucose _____ to _____ mg/dL  give _____ units
Blood glucose _____ to _____ mg/dL  give _____ units
Blood glucose _____ to _____ mg/dL  give _____ units
Blood glucose _____ to _____ mg/dL  give _____ units
INSULIN THERAPY (Continued)

When to give insulin:
Lunch
☐ Carbohydrate coverage only
☐ Carbohydrate coverage plus correction dose when blood glucose is greater than _____ mg/dL and ____ hours since last insulin dose.
☐ Other: ____________________________________________________________

Snack
☐ No coverage for snack
☐ Carbohydrate coverage only
☐ Carbohydrate coverage plus correction dose when blood glucose is greater than _____ mg/dL and ____ hours since last insulin dose.
☐ Other: ____________________________________________________________

☐ Correction dose only:
   For blood glucose greater than _____ mg/dL AND at least _____ hours since last insulin dose.
   ☐ Other: ____________________________________________________________

Fixed Insulin Therapy
Name of insulin: ______________________________________________________
☐ ____ Units of insulin given pre-lunch daily
☐ ____ Units of insulin given pre-snack daily
☐ Other: ____________________________________________________________

Parental Authorization to Adjust Insulin Dose:
☐ Yes  ☐ No  Parents/guardian authorization should be obtained before administering a correction dose.
☐ Yes  ☐ No  Parents/guardian are authorized to increase or decrease correction dose scale within the following range: +/- _____ units of insulin.
☐ Yes  ☐ No  Parents/guardian are authorized to increase or decrease insulin-to-carbohydrate ratio within the following range: _____ units per prescribed grams of carbohydrate, +/- ____ grams of carbohydrate.
☐ Yes  ☐ No  Parents/guardian are authorized to increase or decrease fixed insulin dose within the following range: +/- _____ units of insulin.
INSULIN THERAPY (Continued)

Student’s self-care insulin administration skills:

☐ Yes ☐ No Independently calculates and gives own injections
☐ Yes ☐ No May calculate/give own injections with supervision
☐ Yes ☐ No Requires school nurse or trained diabetes personnel to calculate/give injections

ADDITIONAL INFORMATION FOR STUDENT WITH INSULIN PUMP

Brand/Model of pump: __________________ Type of insulin in pump: ________________
Basal rates during school: ________________________________________________________
Type of infusion set: _____________________________________________________________
☐ For blood glucose greater than _____ mg/dL that has not decreased within
   ______ hours after correction, consider pump failure or infusion site failure. Notify
   parents/guardian.
☐ For infusion site failure: Insert new infusion set and/or replace reservoir.
☐ For suspected pump failure: suspend or remove pump and give insulin by syringe or
   pen.

Physical Activity
May disconnect from pump for sports activities ☐ Yes ☐ No
Set a temporary basal rate ☐ Yes ☐ No _____% temporary basal for _____ hours
Suspend pump use ☐ Yes ☐ No

Student’s self-care pump skills: Independent?

Count carbohydrates ☐ Yes ☐ No
Bolus correct amount for carbohydrates consumed ☐ Yes ☐ No
Calculate and administer correction bolus ☐ Yes ☐ No
Calculate and set basal profiles ☐ Yes ☐ No
Calculate and set temporary basal rate ☐ Yes ☐ No
Change batteries ☐ Yes ☐ No
Disconnect pump ☐ Yes ☐ No
Reconnect pump to infusion set ☐ Yes ☐ No
Prepare reservoir and tubing ☐ Yes ☐ No
Insert infusion set ☐ Yes ☐ No
Troubleshoot alarms and malfunctions ☐ Yes ☐ No
OTHER DIABETES MEDICATIONS

Name: _______________________ Dose: ________ Route: _____ Times given: ____
Name: _______________________ Dose: ________ Route: _____ Times given: ____

<td>______ to _______</td>
<td></td>
</tr>
</tbody>
</table>

Other times to give snacks and content/amount: __________________________________

Instructions for when food is provided to the class (e.g., as part of a class party or food sampling event):
__________________________________________________________

Special event/party food permitted: □ Parents/guardian discretion
□ Student discretion

Student’s self-care nutrition skills:
□ Yes □ No Independently counts carbohydrates
□ Yes □ No May count carbohydrates with supervision
□ Yes □ No Requires school nurse/trained diabetes personnel to count carbohydrates

PHYSICAL ACTIVITY AND SPORTS

A quick-acting source of glucose such as □ glucose tabs and/or □ sugar-containing juice must be available at the site of physical education activities and sports.

Student should eat □ 15 grams □ 30 grams of carbohydrate □ other__________
□ before □ every 30 minutes during □ after vigorous physical activity
□ other ________________________________

If most recent blood glucose is less than _______ mg/dL, student can participate in physical activity when blood glucose is corrected and above _______ mg/dL.

Avoid physical activity when blood glucose is greater than _______ mg/dL or if urine/blood ketones are moderate to large.

(Additional information for student on insulin pump is in the insulin section on page 6.)
DISASTER PLAN
To prepare for an unplanned disaster or emergency (72 HOURS), obtain emergency supply kit from parent/guardian.

☐ Continue to follow orders contained in this DMMP.
☐ Additional insulin orders as follows: _______________________________
☐ Other: _______________________________

SIGNATURES
This Diabetes Medical Management Plan has been approved by:

__________________________________________ Date
Student’s Physician/Health Care Provider

I, (parent/guardian:) __________________________ give permission to the school nurse or another qualified health care professional or trained diabetes personnel of (school:) __________________________ to perform and carry out the diabetes care tasks as outlined in (student:) __________________’s Diabetes Medical Management Plan. I also consent to the release of the information contained in this Diabetes Medical Management Plan to all school staff members and other adults who have responsibility for my child and who may need to know this information to maintain my child’s health and safety. I also give permission to the school nurse or another qualified health care professional to contact my child’s physician/health care provider.

### Actions for Treating Hypoglycemia

- Notify School Nurse or Trained Diabetes Personnel as soon as you observe symptoms.
- If possible, check blood glucose (sugar) at fingertip.
- Treat for hypoglycemia if blood glucose level is less than ____ mg/dL.
- **WHEN IN DOUBT, ALWAYS TREAT FOR HYPOGLYCEMIA AS SPECIFIED BELOW.**

#### Treatment for Mild to Moderate Hypoglycemia

- Provide quick-acting glucose (sugar) product equal to ____ grams of carbohydrates.
  - Examples of 15 grams of carbohydrates include:
    - 3 or 4 glucose tablets
    - 1 tube of glucose gel
    - 4 ounces of fruit juice (not low-calorie or reduced sugar)
    - 6 ounces of soda (½ can) (not low-calorie or reduced sugar)
- Wait 10 to 15 minutes.
- Recheck blood glucose level.
- Repeat quick-acting glucose product if blood glucose level is less than ____ mg/dL.
- Contact the student’s parents/guardian.

#### Treatment for Severe Hypoglycemia

- Position the student on his or her side.
- Do not attempt to give anything by mouth.
- Administer glucagon: _____ mg at __________ site.
- While treating, have another person call 911 (Emergency Medical Services).
- Contact the student’s parents/guardian.
- Stay with the student until Emergency Medical Services arrive.
- Notify student’s health care provider.
Hyperglycemia Emergency Care Plan
