NDEP National Diabetes Month Partner Promotions Call

Tuesday, September 10, 2013
2-3 PM ET
Today’s Agenda

• Review of NDEP Offerings and Plans for National Diabetes Month
  o Theme
  o Overview of NDEP Materials and Activities
  o Ideas for Using NDEP Offerings

• Partner Presentation

• Ongoing NDEP Promotions

• Question & Answer
Webinar Logistics

• **All lines are muted**

• **Two ways to ask questions during webinar:**
  1. Type your question into the chat section and we will read your question aloud
  2. Click the “raise hand” icon and we will call your name and unmute your line allowing you to ask your question
National Diabetes Month Theme: *Diabetes is A Family Affair*

This National Diabetes Month, the National Diabetes Education Program Reminds You That Diabetes is a Family Affair.
Diabetes is a Family Affair

- If You Have a Family History of Diabetes, You Are At Risk
- If You – or Someone You Love – Has Diabetes, Family Support is Important
- Help Your Community Stay Healthy
  - Community settings, such as schools, worksites, senior centers, and places of worship, are part of an extended family, and so is your health care team
National Diabetes Month 2013:

**Diabetes is a Family Affair**

Diabetes is a challenging disease that affects the entire family in many ways. If you are living with diabetes or have a loved one with the disease, family support is very important when it comes to managing diabetes and preventing serious health problems. It’s also important to know that if you have a family history of diabetes – such as a mother, father, brother, or sister – you are at risk for developing type 2 diabetes.

The NDEP offers resources to help you make healthy lifestyle changes as a family as well as resources that can be used in community settings that are a part of the extended family, such as schools, businesses, and the healthcare community, among others.

Check out these NDEP resources and help your family and community stay healthy.

**World Diabetes Day**

14 November
If You Have a Family History of Diabetes, You Are At Risk

Family Health History and Diabetes

Family health history is an important risk factor for developing type 2 diabetes.

Did you know?

- Nearly 20 million Americans have diabetes.
- Seven million people with diabetes do not even know they have this disease.
- An estimated 70 million adults in the U.S. have prediabetes, placing them at increased risk for developing type 2 diabetes.
- Having a family history of diabetes places you at increased risk for developing type 2 diabetes.
- If you are a woman who had gestational diabetes during pregnancy, you are at increased risk for developing diabetes, and the child of that pregnancy is at increased risk for obesity and type 2 diabetes.

But there is good news! If you are at risk for diabetes, there are things you can do to prevent or delay type 2 diabetes.

Take the Family Health History Quiz
If You – or Someone You Love – Has Diabetes, Family Support is Important

I Have Diabetes

If you are living with diabetes or have a loved one with the disease, it’s important to work together to manage diabetes to stay healthy and prevent complications. Managing diabetes is not easy, but support from family members can make it much easier. The NDEP has resources for making healthy lifestyle choices that not only help people with diabetes manage the disease, but also help keep the whole family healthy.

Here are four key steps to help you control your diabetes and live a long, active life.

**Step 1: Learn About Diabetes**
Diabetes means that your blood glucose (blood sugar) is too high. There are two main types of diabetes.

**Step 2: Know Your Diabetes ABCs**
Talk to your health care team about how to manage your A1C (blood glucose or sugar), blood pressure, and cholesterol. This will help lower your chances of having a heart attack, stroke, or other diabetes problems.

**Diabetes HealthSense**
Find tools and programs that can help you with making lifestyle and behavior changes. Diabetes HealthSense also includes research articles on lifestyle changes and behavioral strategies.

**Step 3: Manage Your Diabetes**
Many people avoid the long-term problems of diabetes by taking good care of themselves. Work with your health care team to reach your ABC goals. Use this self-care plan.

**Step 4: Get Routine Care to Avoid Problems**
See your health care team at least twice a year to find and treat any problems early. Ask what steps you can take to reach your goals.

**Diabetes and Heart Health**
If you have diabetes, it’s important to take care of your heart. Learn about how diabetes affects your heart and tips for lowering your risk for heart disease and other heart problems.

Publications

**4 Steps to Manage Your Diabetes for Life**
These four steps help people with diabetes understand, monitor, and manage their diabetes to help them stay healthy. This publication is excellent for people newly diagnosed with diabetes or who just want to learn more about controlling the disease.

**Tasty Recipes for People with Diabetes and Their Families**
A bilingual booklet. Tasty Recipes is filled with recipes specifically designed for Latin Americans. Recipes are accompanied by their nutritional facts table. The booklet also includes diabetes health information and resources. This effective, yet practical, educational promotional tool is a terrific.

Resources

**National Diabetes Month 2013 Feature Article**
Submit this article to your local newspaper or promote it in your organization’s newsletter or e-newsletter.

**Take Care of Your Diabetes to Keep Your Kidneys Healthy**
If you have diabetes, it’s important that you know about this link between diabetes and kidney disease, and what you can do to keep your kidneys healthy. Share this article in your organization’s newsletter or with media to promote diabetes awareness.
Help Your Community Stay Healthy

Help Your Community Stay Healthy

Bring Diabetes Information to Your Community

Community settings such as schools, worksites, senior centers and places of worship are part of our extended family, and so is your health care team. NDEP has many resources and tools that can be used in a variety of settings to strengthen community and clinical linkages that span the spectrum of diabetes prevention and management.

Check out some of these resources from the NDEP and help people in your community stay healthy.

Help Your Community Stay Healthy

## Schools
- Use NDEP’s resources and tools to promote diabetes support in schools.

## Businesses
- Help businesses or managed care companies assess the impact of diabetes in the workplace.

## Health Care Community
- Use NDEP’s Practice Transformation site, clinical practice tools, and patient education materials to help the health care community meet the needs of people with or at risk for diabetes.

### Additional Resources

- [The Road to Health Toolkit](#)
  - Designed for African Americans and Hispanics/Latinos at risk for type 2 diabetes, this tool kit provides materials to start a community outreach program reinforcing the message that type 2 diabetes can be delayed or prevented.

- In addition to NDEP resources, the CDC-led [National Diabetes Prevention Program](#) is designed to bring communities evidence-based lifestyle change programs for preventing type 2 diabetes. It is based on the landmark Diabetes Prevention Program study led by the National Institutes of Health.

To win, we have to lose. Share the following videos about type 2 diabetes from the HBO Documentary Films series, *The Weight of The Nation*, which explores the obesity epidemic in America. You can also use the Community Meeting Toolkit to plan a screening event at your organization.

Traditional Media

- Created press release, which focused on NDEP’s Changing the Way Diabetes is Treated theme for 2012
- Wrote and recorded PSAs using NDEP phrasing
- New for 2013: personal stories, TV

National Kidney Foundation of Michigan recognizes National Diabetes Month

Diabetes affects nearly 26 million Americans and an estimated 79 million people are at risk for developing the disease. The state of Michigan ranks 15th highest in the nation for diabetes prevalence. An estimated 701,000 people in Michigan have diagnosed diabetes, and more than 364,000 are estimated to have diabetes but are currently undiagnosed. Diabetes causes over 40 percent of all kidney failure cases, making it the leading cause of kidney failure.

November is National Diabetes Month and the National Kidney Foundation of Michigan is changing the way diabetes is treated by helping people better understand how to make the necessary changes in their day-to-day life in order to prevent type 2 diabetes, manage their diabetes to prevent complications, and live healthier lives.

Making changes in how you care for your health is a matter of trying and learning. It’s all about choosing a goal and working toward it. Making a plan and taking the first step will help you reach your goal.

1. Think about what is important to your health. What are you willing and able to do?
2. Decide what your goals are. What changes do you want to make? Choose one goal to work on first.
3. Decide what steps will help you reach your goal.
4. Pick one step to try this week.

This month, make a change to live well at www.YourDiabetesInfo.org. For fitness and health classes, diabetes-related events, disease management workshops, and much more throughout the state of Michigan, please visit the NKFM’s website at www.nkfm.org and search for “Diabetes Month.”

  - Infographics
  - Instagram & Pinterest added

---

**TODAY IS DIABETES ALERT DAY!**

ONE IN TWELVE

U.S. adults has been diagnosed with diabetes.
At the current rate of growth, one in four U.S. adults will be diagnosed with diabetes by 2050.

25.8 MILLION

Americans have diabetes.

Diabetes is the leading cause of kidney failure, causing over 40% of all kidney failure cases.

Diabetes disproportionately affects some groups of people more than others, such as certain racial/ethnic groups, physically inactive people, overweight people and those who have a family history of the disease. Having diabetes does not mean you will get kidney disease. The better a person with diabetes keeps their blood sugar and blood pressure under control, the lower the chance of getting kidney disease. That's why it's so important to learn to manage diabetes, and to take steps to prevent diabetes if you are at risk.

What is NDEP Promoting this Quarter?

Partners & Community Organizations

Who can become an NDEP partner? You can make a difference in diabetes prevention and control by taking an active role in the National Diabetes Education Program. All organizations, associations, and groups that promote NDEP messages and materials are welcome to be NDEP partners. Partners are the key to NDEP’s success and work with NDEP in a variety of ways to identify needs for collaboration and strategic opportunities for new projects and initiatives. If you or your organization is active at the local or state level, NDEP also encourages you to join our State Diabetes Prevention and Control Programs, efforts to expand the reach of NDEP messages and activities.

Why become an NDEP partner?
NDEP partners can benefit from using NDEP’s messages, campaigns, and materials. For example, NDEP partners can:

• Expand their activities and have a greater impact by combining efforts with resources with NDEP and other organizations.
• Adopt NDEP’s messages and promote them within their organization and to the communities they serve.
• Adapt and tailor messages for target audiences as appropriate.
• Disseminate information and materials to media, community organizations, and target audiences.
• Coordinate education activities and share resources with other partner organizations.
• Use NDEP resources to mobilize the health care delivery system to improve access and responsiveness.
• Join one of NDEP’s Stakeholder Groups. These groups provide partners with a way to share ideas and provide input and guidance to help NDEP continue to respond to the needs of diverse audiences affected by diabetes.

3 Easy Ways to Get Involved with NDEP

1. Link to the NDEP website
   Post NDEP web buttons to your organization’s website and encourage your partners to do the same.

2. Share our articles
   Post one of NDEP’s many ready-to-use articles on your website or in your organization’s newsletter.

3. Engage using social media
   Like and comment on Facebook posts, retweet NDEP messages, and share NDEP videos.
